

EyeOn Master class Plan for sustainability

Planning for a better, more sustainable future

Sustainability leaders & supply chain leaders.

The 'Plan for sustainability' master class is facilitated by Julie Goossens, Katie Cullen and Maximo Jara.

€ 1195,- excl. VAT

You will receive a certificate afterwards.

90% of companies expect to have aligned sustainability and business targets within the next 5 years. An efficient and sustainable supply chain plays an important role in achieving this goal. The first step in this journey is creating awareness within your organization and understanding the dynamics of a supply chain, and how they can impact the environment.

One challenge many organizations face is how to collate information that can provide actionable insights into how to reduce environmental impact. The current climate situation further increases the need for preventing waste and balancing the organization's value chain, while maintaining a high service level and a profitable financial return.

In this full day EyeOn Academy master class, you will gain awareness of the effects that supply chain dynamics can have on the environment, how to use reporting techniques to quantify these effects within your organization, and how to use best practice techniques to mitigate those effects and achieve a more efficient, environmentally friendly supply chain.

Learning goals

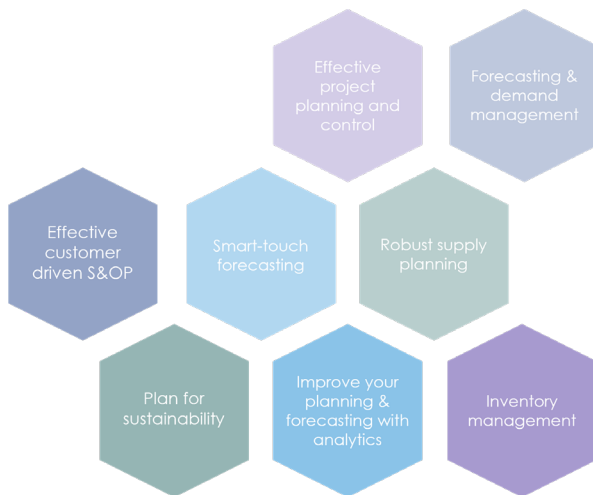

After attending this 'Plan for sustainability' master class you will be able to:

- Identify the effects that supply chain planning can have on waste, obsolescence, and CO₂ emissions.
- Understand the best practices to balance your value chain and reduce waste and obsolescence.
- Implement improvements in your reporting and analytics to optimize your inventory management with respect to excess and obsolescence.
- Explore the opportunities which improved forecast techniques can bring for preventing waste and reducing environmental impact.

The training includes real life case examples, reporting demos and an interactive game. This course also offers a unique opportunity to meet and discuss with your supply chain and sustainability peers from other companies.

EyeOn master classes
