

EyeOn master class driving inventory health

Inventory managers, inventory analysts, supply (planning) managers, S&OP managers, supply chain managers.

The training 'inventory management' is facilitated by Dr. Maarten Driessen and Dhr. Maarten van Liempd (EyeOn).

€ 2295,- excl. VAT, training documentation and lunch included, dinner and lodging excluded.

You will receive a certificate afterwards.

For dates and locations see our EyeOn event calendar

"How to reduce working capital?", "How to manage safety stocks?", "Where to hold inventory in the supply chain?". As supply chains have become more complex, markets are increasingly volatile and manufacturing output remains variable, high-performance inventory management can make a real difference. Optimizing inventories while delivering the desired service to the market, remains one of the key elements of supply chain management.

Inventories are inevitable as a way to mitigate supply and demand uncertainties. At the same time, inventory reduction directly leads to reduced risk and increased organizational responsiveness and flexibility. In most organizations, there is plenty of room for lowering inventory levels and increasing customer service at the same time.

What are the best practices to implement optimal inventory policies? How to keep these policies up-to-date in an ever-changing environment? And how to effectively deploy inventory strategies?

This EyeOn 'inventory management training' is designed to introduce the key concepts and core requirements needed to design and implement robust inventory management practices that drive your business.

LEARNING GOALS

After attending this 'inventory management master class' you are able to:

- Define and execute improvements to your inventory management process.
- Circumvent potential obstacles and barriers to changing the process.
- Identify how to integrate inventory management into critical business processes.
- Implement meaningful measurements for inventory management.
- Evaluate skills and competencies needed in inventory management.

This course also offers a unique opportunity to meet and discuss with your inventory management peers from other companies in the industry. The training combines theory with many real life case examples.
